

# SHOW YOUR COLOURS!

## SHOW YOUR TRUE COLOURS! – CLEAR STATEMENTS AND RECOGNISABILITY

A summer season that is everything you could possibly hope for: Intense, bright colours powerfully recapture their position as the medium for expressing fashionable modernity. Brilliant and loud digital prints have made people want more, acting as a catalyst for a fashionable colour offensive. Colours dare to take the step from being an invigorating graphical accent to being flat all-overs, they enter into unusual colour combinations and boost contrasts to exude expressive radiance.

The focus is still on real objects, genuine and durable materials – and visibly hand made workmanship. Inspiring impulses are transmitted by innovative materials that augment natural properties with technical possibilities.

Brightness, lightness and earthy materiality have found their place in the real world of fashion, now they need colour as a partner and as a medium for modernity.

## FOCUS TREND
